DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 34-51 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,076,469 to Pleuse et al.

Pleuse shows a device for delivering a fluid as seen in Fig. 1, having a dispensing body 10 with flow channels and capable of being connected to with a fluid source, a discharge orifice 36 in communication with the flow channel, a heat transfer chamber, see Fig. 6, a foraminous body 50 position in the heat transfer chamber, a heat transfer and heating element device 51 coupled to the foraminous body, see Fig. 2, a housing 5 containing the heat transfer chamber, the foraminous material can be a removable cartridge, see column 2, lines 33-40 and an application valve module 15.

With respect to claims 39 and 49:

The foraminous body is constructed from a sintered material, see column 5, lines 39 and 40.

With respect to claims 44 and 50:

See Fig. 6.

With respect to claims 45 and 51:

A heating element surrounds the foraminous body, see column 2, lines 44 to 49.

With respect to claims 34-37:

The device of Pleuse shows the steps of feeding fluid into a chamber, heating the fluid using a furaminous body to help transferring the heat from a heat source to the fluid to be dispensed as the fluid filters through the furaminous element as claimed in the method claims.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Durmann shows an apparatus for spraying heat responsive materials. Schmid shows a dental handpiece for heating media. Fiedler shows an air dryer.
